

What you don't know can kill you.

*Over 1/4 of
the people who die
from heart attacks
never have
any symptoms.*

Our 64-Slice CT Scanner and our Board-certified, fellowship trained radiologists and cardiologists can tell you exactly how much plaque buildup you have, the amount of blockage in your blood vessels, and how best to deal with the problem, in a matter of minutes.

Don't wait until you have symptoms to get this exam, because by then it could be too late. As one doctor put it, "you wouldn't wait until your house is on fire to put in a smoke alarm, would you?"

To schedule your Calcium Score or CT Angiography, call us today.
